Digital Literacy Project Report

Student Details

Name: Abdul Mannan Usta
Registration Number: 25BAS10006
Course: CSE0001 – Digital Literacy
University: VIT Bhopal

Introduction

In today's digital age, being digitally literate is essential for students to succeedacademically and professionally. This project was completed as pat of the Digital Literacy course to understand how to use digital tools effectively, maintain an online presence, communicate professionally, and stay safe online.

The project consists of five tasks, each focusing on a different aspect of digital literacy. These tasks helped in developing practical knowledge and awareness of digital platforms and responsible online behavor.

Task 1: Digital Literacy Awareness Infographic

To create awareness about digital literacy, I designed an infographic using **Canva**. The infographic highlights key concepts such as:

- Meaning of digital literacy
- Safe internet practices
- Useful tools for students
- Professional online presence

The design uses simple visuals, icons, and short descriptions to make it easy to understand. The goal was to ensure that even beginners can quickly grasp the importance of digital literacy.

While creating the infographic, I found it interesting to explore design elements like colour combinations and layout structuring. However, it was slightly challenging to present multiple ideas in a single page without making it overcrowded. This task improved my creativity and ability to communicate information visually.

Task 2: Student Digital Portfolio

In this task, I created and updated profiles on the following platforms:

- GitHub
- LinkedIn
- Kaggle

GitHub is used to showcase coding projects and technical skills. I created a profile README including my name, branch, and learning goal s.

LinkedIn is a professional networking platform where I added my education details and will use it to connect with professionals and explore job op portunities.

Kaggle is a platform for data science and machine learning, where I plan to participate in competitions and improve my analytical skills.

These platforms will help me build a strong digital presence over the next four years.This task made me realize the importance of maintaining a professional online identity.

Task 3: Exploring Digital Platforms

In this task, I explored different digital platforms and actively used them. The platformsincluded:

- Google Workspace (Docs, Drive)
- YouTube (learning tutorials)
- Coursera / online learning platforms

I used Google Docs to create and manage documents, while Google Drive helped in storing and sharing files. YouTube was useful for learning new concepts through videos.

Through this task, I learned how digital platforms can enhance productivity, collaboration, and learning. It also helped me understand how to use these tools effectively for academic purposes.

Task 4: Email Etiquette

Professional email communication is an important skill. In this task, I learned how to write proper emails.

Key Email Etiquette Rules:

- Use a clear subject line
- Start with a formal greeting
- Keep the message concise
- Use polite language
- End with a proper closing

Sample Email:

Subject: Request for Assignment Clarification

Dear Sir/Ma'am,

I hope you are doing well. I am writing to seek clarification regarding the Digital Literacy project submission guidelines. I would like to confirm the format and deadline for submission.

I would be grateful if you could guide me on this.

Thank you for your time and support.

Yours sincerely,
ABDUL MANNAN USTA[25BAS10006]

This task helped me understand the importance of professional communication in academic and workplace environments.

Task 5: Cyber Safety Case Study

Case Study:

A student received a fake email claiming to be from a bank asking for login details. Believing it to be real, the student shared sensitive information and lost access to their account.

Issues Identified:

- Phishing attack
- Lack of awareness
- Sharing confidential information

Prevention Checklist:

- Never share passwords or OTPs
- Check sender email carefully

- Avoid clicking suspicious links
- Use strong passwords
- Enable two-factor authentication

This task highlighted the importance of cybersecurity and being cautious while using the internet.

Conclusion

This Digital Literacy project provided valuable insights into the digital world. From creating content and building a professional portfolio to understanding email etiquette and cybersecurity, each task contributed to developing essential digital skills.

These skills will not only help in academics but also in future career growth. Overall, this project was a great learning experience that improved both technical and practical knowledge.
